EDUCATION

Noida Institute of Engineering and Technology, Greater Noida

B.Tech - Computer Science and Engineering (AIML)

Greater Noida, Uttar Pradesh

2023–2026

CGPA: 7.38

Guru Nanak Dev Institute of Technology, Rohini

Diploma - Computer Science and Engineering

Rohini, Delhi

2019–2022

CGPA: 8.6

Bal Bhawan Public Senior Secondary School, Delhi

CBSE - 10th

Delhi

2008–2019

Percentage: 80%

PROJECTS

Face Recognition Attendance System OpenCV, Dlib, Google Firebase, Python

March 2024

- Built a real-time AI-powered face recognition attendance system using OpenCV and Dlib, achieving 95%+ facial recognition accuracy with over 500 training samples.
- Automated attendance marking, reducing manual attendance time by 80% and minimizing human errors.
- Integrated Google Firebase for secure, cloud-based data storage with real-time retrieval, supporting 24/7 access with zero downtime.
- Implemented duplicate detection logic to prevent 100% of duplicate entries within a 24-hour window, ensuring data integrity.

Accurate Weather Forecasting App SwiftUI, Weather API Integration

January 2022

- Designed and developed a SwiftUI-based weather forecasting application for iOS devices including iPhones, iPads, and Macs, achieving a 20% faster load time compared to similar apps.
- Integrated real-time weather APIs ensuring 100% user data privacy and minimal permission access, enhancing user trust.
- Optimized application performance by reducing system resource usage by 30% through efficient data retrieval and caching techniques.
- Deployed the solution across 3+ sectors including agriculture, solar energy management, and chemical plant monitoring.

TECHNICAL SKILLS

Languages: Python, C, Basic SwiftUI, SQL

Databases: MySQL, MongoDB

Developer Tools: VS Code, Figma, IntelliJ, Jupyter Notebook, Google Colab, StarUML, Xcode, Power BI, Tableau

CERTIFICATIONS

- Data Science Using Python - NSIC
- Getting Started with AI using IBM Watson - Coursera
- Basic Data Descriptors and Statistical Distributions - Coursera
- Artificial Intelligence: Types of AI - Infosys Springboard
- Artificial Intelligence using Python - Infosys Springboard
- Intelligent Document Processing with Azure AI - Microsoft
- Build an Azure AI Vision Solution - Microsoft
- NLP with Azure AI Language - Microsoft
- Machine Learning Foundations - Coursera
- Building AI-Powered Chatbots Without Programming - Coursera
- Fundamentals of Deep Learning - Nvidia

ACHIEVEMENTS

Third Place - Bug Finding Competition (Data Structures and Algorithms)

2023

- Secured third position in a competitive coding event by identifying and fixing code bugs across Easy, Medium, and Hard levels.
- Demonstrated expertise in Data Structures, Algorithms, and debugging using C and Python.
- Improved code efficiency and logical correctness under timed conditions, showcasing strong analytical skills.
